

CSE WP3 D3.3 Database

Link to the Cera-Award database:

<http://www.cera-award.be/projecten>

Initially the creation of a structured database or platform for the announcement of project proposals was part of this WP. However deliverable **D3.3 Database** refers to the Cera-Award database that contains project proposals in Dutch.

The WP leaders of WP3 and WP5 concluded it would be better to integrate project proposals in deliverable D5.1 Well-structured database. This database (D5.1) keeps track of selected project proposals and their results as well as it offers the project ideas/proposals for students to start from (D3.3).

Both deliverables are merged into one.
